YUGUANG (ROGER) BAI

Mathematics Ph.D. Candidate

rogerbai92@gmail.com | 647-573-3158 | Toronto, Ontario, Canada | roger-bai.github.io/personal-webpage/
roger-bai-404a061b4 | roger-bai

PROFILE

Motivated and skilled Ph.D. candidate seeking an entry level position in the cybersecurity sector. Highly capable in quantitative areas as well as being able to explain technical concepts to others. Very interested in using acquired skills and knowledge to improve and protect society as a whole.

EDUCATION

Ph.D. in Mathematics

University of Toronto

Expected Summer 2021 — Toronto, ON

Thesis: Cluster Algebra Structure for Mirković-Vilonen Cycles and Polytopes
Notable Course: Cryptography

Palette x Fields Accelerated Cybersecurity Training

Fields Institute

Nov. 2020 – Jan. 2021 — Toronto, ON

Learned a variety of topics such as
- Risk Management, Cryptography, Penetration Testing

EXPERIENCE

Researcher

University of Toronto

Sept. 2016 – Ongoing — Toronto, ON

- Currently collaborating with two others on a research project for interpreting geometric objects as matrices; finalizing results
- Conjectured my own formula about a relationship between geometric objects and proved it; invited to and presented results at Layola University Chicago

Course Instructor

University of Toronto

Jan. 2020 – Ongoing — Toronto, ON

- Taught hundreds of students in various disciplines in mathematics, particularly those in linear algebra
- Was one of the first instructors to teach and be in charge of a course during the COVID-19 pandemic, laying the foundation and provided advice for future courses
- Achieved an overall 4.4/5 course evaluation from students

Teacher's Assistant

University of Toronto

Sept. 2015 – Dec. 2019 — Toronto, ON

- Worked with and helped a variety of students in areas such as calculus, linear algebra, and MATLAB programming
- Debugged several students' code and helped them understand their own code

KEY SKILLS

Creative Thinking and Problem Solving | Detail-Oriented | Quick Learner | Excellent Writing and Communication

LANGUAGES

Python	●●●●○
MATLAB	●●●●○
SQL	●●●○○

TOOLS USED

Metasploit | Meterpreter | nmap | PowerSploit | OWASP ZAP | Burp Suite | Wireshark | Splunk

PRESENTATIONS

The Geometric Satake Isomorphism

University of Toronto

Dec. 2019

Cluster Algebras and MV Cycles/Polytopes

Layola University Chicago

Nov. 2019

Derived Categories and its Applications to Sheaves

University of Toronto

Oct. 2018

SPECIFIC INTERESTS

Badminton | Mystery novels | Cybersecurity | Machine Learning | Reinforcement Learning
